Professional Summary

Results-driven **DevOps Engineer** with **5+ years of IT experience**, including **2+ years of hands-on DevOps engineering experience** and 3 years of enterprise production support experience across L1 and L2 environments. Experienced in building and supporting **CI/CD pipelines, containerized applications, cloud infrastructure, deployment automation, monitoring and production operations**.

Strong hands-on experience with **Linux, Git, GitHub, Docker, Jenkins, AWS, CI/CD, Python, Bash, Shell Scripting, Grafana, Kibana and VisualCron**. Experienced in automating build, deployment and operational processes, troubleshooting production environments, supporting application releases, implementing monitoring solutions and improving operational efficiency through scripting and automation.

Proven experience in managing production workloads, resolving critical incidents, performing root cause analysis, supporting application deployments and collaborating with development, infrastructure and business teams. Delivered **8+ enterprise automation solutions**, managed **70+ production jobs**, supported **50+ VisualCron workflows**, and processed **200+ production files daily**, reducing manual operational effort by approximately **70%**.

Professional Experience

DevOps Engineer **Aug 2024 – Present**

Xceedance Consulting India Pvt Ltd *Gurugram, India*

DevOps Projects

- Worked as a **DevOps Engineer** across two enterprise application projects, focusing on **CI/CD, deployment automation, Docker containerization and AWS cloud operations**.
- Designed, configured and maintained **CI/CD pipelines** for automated source code checkout, application build, validation, Docker image creation and deployment, improving release consistency and reducing manual deployment effort.
- Implemented CI/CD workflows for a **.NET, Angular and SQL Server** based enterprise application and a **React, Node.js and MongoDB** based application, supporting repeatable application delivery across environments.
- Created and maintained **Dockerfiles** and built application images for containerized deployments, integrating Docker into CI/CD workflows for consistent application packaging.
- Worked with **Git/GitHub** for source code management and integrated repositories with CI/CD pipelines to automate application build and deployment workflows.
- Worked with **AWS EC2, IAM and S3** for application deployment, access management, environment operations and application-related cloud activities.
- Troubleshot **pipeline, build, Docker and deployment failures** by analyzing CI/CD logs, application logs and deployment configurations, collaborating with development and QA teams to resolve issues.
- Supported application releases across development and production environments through deployment validation, post-deployment checks and production verification.

Production Support Engineer (L2) **Aug 2022 – Jul 2024**

Xceedance Consulting India Pvt Ltd *Gurugram, India*

EAS - Enterprise Application System

- Provided **L2 Application & Production Support** for **3+ mission-critical enterprise applications**, handling production incidents, application troubleshooting and SLA-driven operational activities.
- Performed advanced troubleshooting across **Linux and Windows** environments using application/system logs, SQL analysis and monitoring dashboards to identify root causes and restore services.
- Managed **70+ production jobs and 50+ VisualCron workflows**, resolving scheduling failures, dependency issues and job execution failures while maintaining production reliability.
- Performed **RCA** for high-severity incidents and implemented corrective/preventive actions and process improvements to reduce recurring production issues.
- Developed and supported **8+ enterprise automation solutions** using **Python, Bash, Shell Scripting, VBScript, Batch Script, SQL Server and VisualCron**, reducing manual operational effort by approximately **70%**.
- Supported application deployment and release activities using **Git, GitHub, Jenkins and Azure DevOps**, including deployment validation, smoke testing and post-deployment production health checks.
- Worked with **AWS EC2, IAM and S3** for cloud operations, application access validation and production support activities, while collaborating with development, L3 and business teams to resolve technical issues.

Junior Production Support Engineer (L1) **Sept 2021 – July 2022**

Xceedance Consulting India Pvt Ltd *Gurugram, India*

Party Central – Enterprise System (BHSI)

- Provided **L1 Application Support** by monitoring enterprise applications, performing initial troubleshooting, analyzing application logs and escalating critical incidents to L2 teams.
- Performed **SQL data validation, log analysis and functional verification** to troubleshoot application issues, validate fixes and maintain application stability.
- Supported **application development, bug fixing, deployments and production release activities**, including deployment validation and post-release verification.
- Developed and maintained application modules using **Angular, HTML, CSS and JavaScript**, gaining hands-on understanding of application architecture, frontend components and backend integrations.
- Collaborated with **Development, QA and L2 Support teams** to investigate application issues, validate fixes and resolve production incidents.

Technical Skills

DevOps & CI/CD: Jenkins, CI/CD Pipelines, Build Automation, Deployment Automation, Release Management, Git, GitHub, Azure DevOps
Cloud & Infrastructure: AWS (EC2, IAM, S3), Cloud Operations, Application Deployment, Environment Management
Containers: Docker, Dockerfiles, Container Image Creation, Containerized Application Deployment
Operating Systems: Linux, Windows, Windows Server
Scripting & Automation: Python, Bash, Shell Scripting, VBScript, Batch Scripting, PowerShell, VisualCron, Windows Task Scheduler
Monitoring & Observability: Grafana, Kibana, ELK Stack, AlertManager, Production Monitoring, Application Monitoring, Log Analysis, Health Checks
Version Control: Git, GitHub, Repository Management, Source Code Integration
Development & Application Technologies: React.js, Angular, Node.js, .NET, PHP, JavaScript, HTML, CSS, REST APIs, API Integration
Databases: SQL Server, SSMS, MySQL, SQL, Stored Procedures, Views, Functions, Triggers, Query Optimization, Data Validation
Networking: TCP/IP, DNS, HTTP/HTTPS, SSH, SFTP, VPN, Basic Networking
Production Operations: Incident Management, Problem Management, Change Management, Root Cause Analysis (RCA), SLA Management, Production Troubleshooting, Stakeholder Management
ITSM & Tools: ServiceNow, Jira, Confluence, MOP/SOP, Runbooks, Technical Documentation
Enterprise Technologies: SFTP, PGP Encryption/Decryption, Banking File Processing (BAI2, ISO20022, CSV, XML, TXT)
Domain: Banking & Financial Services (BFSI), Enterprise Application Support

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering **2017 – 2021**
Bansal College of Engineering, Bhopal

Certifications

- **AWS & DevOps Fundamentals** – Udemy

Achievements

- Delivered **8+ enterprise automation solutions** using Python, Bash, Shell Scripting, VBScript, Batch Script, SQL Server and VisualCron, reducing manual operational effort by approximately **70%**.
- Managed **70+ enterprise production jobs** and **50+ VisualCron workflows**, improving job scheduling reliability, dependency management and production operations.
- Supported **3+ mission-critical enterprise applications** in the BFSI domain, contributing to production stability, proactive troubleshooting and SLA compliance.
- Automated secure processing of **200+ production files daily** across BAI2, ISO20022, XML, CSV and TXT formats using VisualCron, SQL Server, SFTP and PGP encryption.
- Automated SQL data extraction, validation, reporting and file-processing workflows using **VBScript, Batch Script, Bash, Python and SQL Server**, reducing repetitive manual operational activities.
